

Ted Gandolfo
857 Garfield St.,
Franklin Square, NY 11010

5/3/94

Dear Ted,

I can't tell when your 4/28, here today, was mailed because the post office took offense at your reusing a stamp and didn't cancel it.

As you gathered, I was both surprised and disappointed not hearing from you. Phil says that there have been many complaints about big chunks of mail not being delivered in several places. On your tapes, you can insure for up to \$50 for 75¢.

I'd asked you about the shows you can contact that can air me by phone during the unusual hours I now have to keep. To be aired by 6 pm. But I'm up too early and ~~as~~ can, for example, do late-night west-coast ~~am~~ shows. Some of them go on after I'm up. Usually about 1 am but it then takes a little time for me to get going as well as I now can. I know there are daytime talk shows in NY and those I hope you can make some arrangements with. My Case Open, about 20-25 % of what I wrote, is out about a month now and they've not arranged a single show. It does a job of Posner, so well that the publisher figured they could cut the rest, which does even more of a job on him, out entirely. Of course I can do interview shows that are taped. My limited supply of copies gone.

While I did not believe that Oliver Stone would want to have anything to do with me because I am responsible for the publicity that made it clear his JFK is not non-fiction as he said (and without that he had a right to say anything he wanted to say) Because I think he has an axe to grind with Posner I wrote Musconi and told her that the book is out and that if Stone is interested he can have the part that was not published. If my letter had gone by retired snails she had it by now and with her usual politeness, which I recall from the past, she has said nothing. She could have decided not to tell him or he could have decided he is not interested. They spent so much time with phonies and fourflushers who are really subject-matter ignoramuses they are lost in their own sublime ignorance. They, too, really know nothing about the facts. I'm sure Stone would be even more interested in my NEVER AGAIN! that as of my last knowledge is due in September but I won't waste more time on those people who are so much more important than mere mortals.

I have no confidence at all in this supposed new Ray stuff, really do not believe it and from what I know it does not check out with the existing fact. But then to most nothing is more irrelevant than established fact when they can be Perry Masons. I have not tried to keep up with it. I know some of the people supposedly involved, interviewed them long ago and they then indicated none of the new trash. Why they pulled this I do not even try to guess. His lawyer, Bill Pepper, formerly a friend of Mark Lane, is now practising in London and living in England. Bright guy but off on chasing wild geese. If they present at the hearing what was in the paper, they bury Ray deeper than Lane did. Like crying wolf. If they get something the courts then will ignore it. Best, *Kew*
